## The FRED Report

Critical and Memorable FRED Alerts!

What is the most effective way to show that our research has been effective, correct, and helpful? EVERYTHING we have written since the founding of *The FRED Report* is available on the website, listed by date. Subscribers can see how we have done – in all of the markets we cover, at times of their choosing - warts and all!

We publish FREDalerts in difficult market conditions. Sometimes we publish in order to answer subscriber questions. Other times, we call attention to specific market conditions, such as the alert on <u>October 4, 2011</u> and noted below. In all cases these are "rubber meets the road" reports designed to give very specific forecasts during difficult times. We suggest prospective subscribers that want to evaluate the service look at these and other alerts on the site (see <u>the FREDalerts</u> menu on the left hand side of the page) first, and then skim through other reports at key dates if needed. Feel free to contact us if you wish. Decide for yourself if we would have helped your clients over the last few years!

<u>02/05/2010</u> - Currently, we are actively looking for stocks to add to our list, and will likely start to add next week. The end of the world is not at hand, but we do think that a divergence or cut-out low could occur.

<u>08/09/2011</u> - We are not giving up on a market rally from here to 1200 to 1235. This area represents the best place to mount a rally we have seen since the decline began. Note this should start immediately, with the set-up we have.

4514 Chamblee-Dunwoody Rd, Suite 112 Dunwoody, GA 30338 Phone: (404) 875-FRED <u>fred@thefredreport.com</u> <u>www.thefredreport.com</u>

<u>10/04/2011</u> - The SPX (and SPY) have made the new price and closing lows forecast in early August to complete the pattern and potentially **forecast a rally of some magnitude**.
